nutrinovo simply innovative nutrition

Liquid Plant Based Protein

- Food for special medical purposes
- 100% Essential amino acids
- Suitable for vegan diets
- Halal certified
- Suitable for kosher diets

NEW ProSource TF Plant is a unique plant-based version of the UK's number one liquid protein for enteral feeding, ProSource TF.

Containing 15g protein in each 45ml sachet, ProSource TF Plant uses high biological value pea protein to provide a product that is vegan & vegetarian suitable, water-thin and contains all essential amino acids at levels you would expect from a ProSource product. This means that you can use ProSource TF Plant as a key part of supporting your enterally fed patients without compromise.

15G PROTEIN IN EACH 45ML SACHET

Ideal for patients with protein energy malnutrition and /or on a fluid restricted diet e.g. ICU, wounds, pressure sores, burns, renal disease, oncology, liver disease, bariatrics and the elderly malnourished

COMPLETELY PLANT BASED

Suitable for patients requiring a vegan or vegetarian diet. Halal certified and kosher suitable

CONTAINS HIGH BIOLOGICAL VALUE PEA PROTEIN

A complete protein source that contains ALL the essential amino acids at levels you would expect from a ProSource product

PROTEIN IS HYDROLYSED

Hydrolysis breaks down the amino acid chain lengths, which aids gut absorption. ProSource TF Plant behaves as a semi-elemental product

READY TO USE LIQUID WITH 'WATER-LIKE' CONSISTENCY

No pre-mixing is required. The product is ideal for use in enteral feeding tubes as will not cause tube blockages

We always recommend flushing the patient's feeding tube with water pre and post administration of ProSource TF Plant

SINGLE USE STERILE SACHETS

Easy for patients to use and health professionals to administer, whilst assisting with infection control. Can be easily poured directly into a 60ml enteral syringe

LOW ELECTROLYTES

Allows the product to be used with confidence when supporting patients requiring low electrolyte levels, such as those on renal replacement therapy

EASE OF ADMINISTRATION

The presentation of ProSource TF Plant allows it to be administered in a way that best suits each patient's need - either directly through an enteral feeding tube or via an enteral giving set.

Below is a suggested method of administration which is quick, easy, limits any wastage and reduces contamination risk.

- 1. Remove the plunger from a 60ml enteral syringe
- 2. Connect the enteral syringe to the patients enteral feeding tube or giving set
- 3. Open the sachet of TF Plant by removing the easy to tear tab from the top
- 4. Pour the contents directly into the top of the syringe

We recommend flushing the patient's feeding tube with water both before and after the addition of ProSource TF Plant.
