**ONLY
PROSOURCE
WORKS LIKE
PROSOURCE**

ONLY PROSOURCE WORKS LIKE PROSOURCE

ProSource isn't a single product, it's a complete range of unique high protein supplements that can be tailored to your patients' individual needs, without the compromises found in other products.

And we don't use the word unique lightly. Each ProSource product is formulated with a specific patient group in mind. Take ProSource TF for example, we purposely increase the levels of each essential amino acid and branch chain amino acid to match the US Institute of Medicine (IOM) reference pattern for an ideal protein (table.1) -

because quite simply, having the correct levels of essential amino acids, makes the protein more effective.

This means that when you choose a ProSource product for your patient, you can rest assured that you are choosing the most effective liquid protein available and be safe in the knowledge that ONLY ProSource works like ProSource.

WHAT MAKES PROSOURCE UNIQUE?

- Unrivalled amino and branch chain amino acid levels¹
- Separate enteral and oral products that can be tailored to individual needs
- Choice of flavours and presentations to aid compliance
- Neutral variants to support a food first approach
- IDDSI level 4 product to support patients with Dysphagia²
- NEW Vegan option³
- Extensive health professional and patient support materials

Table 1 - Comparison of Product Amino Acid Levels vs. IOM Reference Pattern

Essential Amino Acids	IOM Reference Pattern (mg/g protein)	ProSource TF (mg/g protein)	Typical Renal Protein (mg/g protein)
Histidine	17	18	8
Isoleucine	23	24	15
Leucine	52	55	28.5
Lysine	47	51	33.5
Methionine & Cysteine	23	24	6 (Methionine only)
Phenylalanine & Tyrosine	41	43	26
Threonine	26	28	19
Tryptophan	6	6	3
Valine	29	31	24
Total	264	280	163

"High quality proteins ensure the delivery of a highly digestible protein blend that provides the nitrogen and indispensable amino acids essential for recovery"

Professor Keith Garleb, Adjunct Professor University of Illinois, USA
