

THE NUTRINOVO RANGE: IDDSI LEVELS

This document is designed to clearly illustrate which IDDSI level each Nutrinovo product falls into. Please find the IDDSI Framework & Descriptors diagram on the reverse side of this document. If you require further information, please go to **IDDSI.org**

Nutrinovo Product	IDDSI Levels				
	0	1	2	3	4
  <small>A High Protein Liquid Supplement</small>	Require dilution with water and then can be thickened to required level. We recommend dilution at a ratio of 1:1

*These products can be thickened to a different IDDSI level using a starch or gum based thickener.

Temperature Variances

All Nutrinovo products were independently tested at temperatures between 5°C and 25°C. The information provided above reflects the correct IDDSI levels found between these temperature variances.

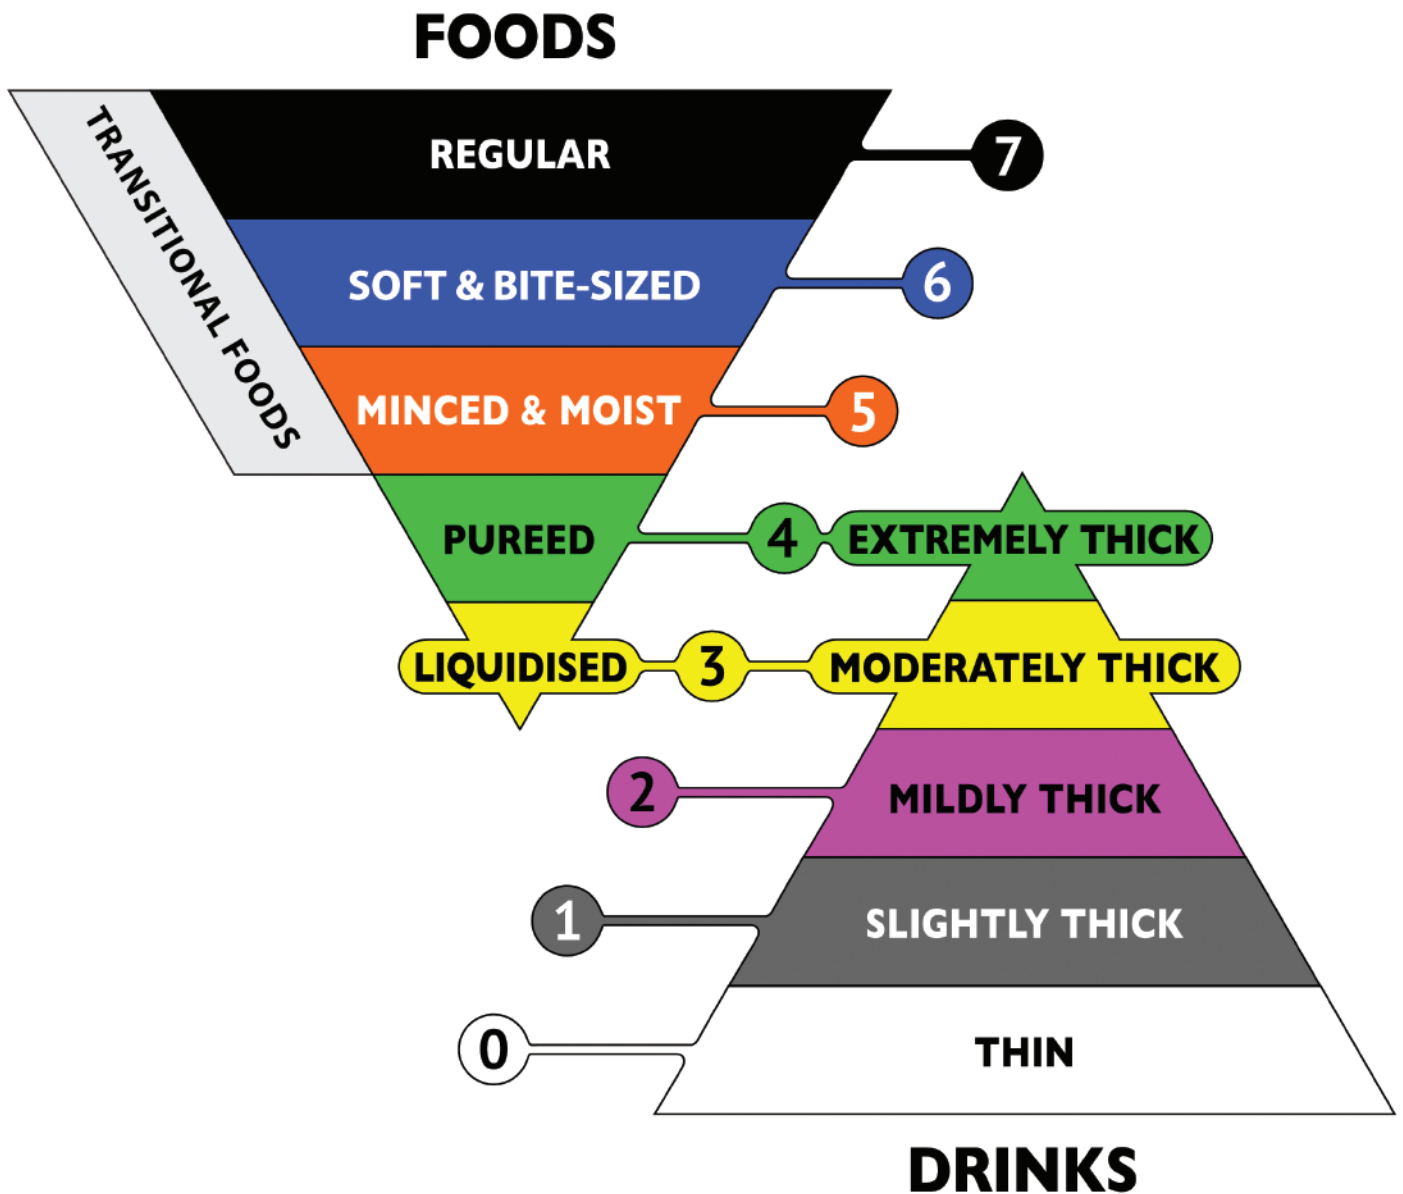

Important Notice

IDDSI Framework and Descriptors act as guidelines and care should be taken to assess the individual needs of each patient. We recommend that advice from a speech and language therapist is sought prior to using any Nutrinovo product with dysphagic patients.

What is IDDSI?

The International Dysphagia Diet Standardisation Initiative (IDDSI) is a global standard with terminology and definitions to describe texture modified foods and thickened liquids used for individuals with dysphagia of all ages, in all care settings, and for all cultures.
