

Spot the difference?

Take a fresh look...

Take a fresh look...

Introducing the new and improved ProSource Jelly.

With an improved flavour, enhanced mouth feel, and a texture consistency that instils confidence every time, ProSource Jelly offers a satisfying, tasty alternative when meeting protein goals is important.

If you haven't tried it recently, then it's worth a fresh look.

20g protein in each 118ml cup

Ideal for protein energy malnutrition and/or patients on a fluid restricted diet e.g. wounds, pressure sores, burns, renal, oncology, liver, bariatrics and elderly malnourished.

Protein is hydrolysed

Hydrolysis breaks down the amino acid chain lengths, which aids gut absorption. ProSource Jelly behaves as a semi-elemental product.

IDDSI level 4*

ProSource Jelly is pre-thickened, amylase resistant and may be suitable for patients with dysphagia. Always consult an SLT for guidance.

*ProSource Jelly has been independently evaluated as an IDDSI level 4 product.

4 great tasting flavours

Blackcurrant, Lime, Orange and Fruit Punch options provide a high level of patient compliance.

A ready-to-eat jelly

Can be eaten straight from the cup and offers a new option to patients tired of typical ONS or pudding type products.

Lightweight recyclable cup

The 6.3g cups are widely recyclable. Scan the QR code to view our recycling guidelines.

IMPROVED

- + TASTE
- + MOUTH FEEL
- + CONSISTENCY
